GENERAL NOTICES. Perhaps no local disease has puzzled and baffled the medical profession more than nasal catarrh. While not immediately fatal, it is among the most distressing and disgusting ills the flesh is heir to, and the records show very few or no cases of radical cure of chronic catarrh by any of the multitude of modes of treatment until the introduction of Ely's Cream Balm a few years ago. The success of the preparation has been most gratifying and surprising.

The Governor then spoke in eulogistic terms of the N. G. C., and paid a high compliment to Company D of this place, who, he said, had been well drilled, and presented as good an appearance as old veterans. He felt very proud of the companies who had been organized and mustered into service during his administration. He did not expect to see such a large and brilliant assemblage as had assembled there. He felt highly honored, and would see more of our people and the town before he left Red Bluff. He again thanked the people for the honor con-

one correspondent, that

When the committee confronted the proposi-When the committee confronted the proposition as to whether the Government could proceed to improve the great waterway, hydraulic mining having ceased, after examining the law it was found impossible to make any immediate appropriation. In other words, a project must have been examined into by the Engineer's department under the terms of an Act of Congress warranting a survey. This, it is claimed by members of the committee, precluded any appropriation for the advacement of the work at this time. It was finally decided to submit the entire matter to a board of engineers, who are authorized to make examinations, surveys, maps and estimates of cost during the coming summer for submitsion to the next Congress.

Assuming this information to be verity, this means, then, that nothing will be done the present season, and that the whole subject will go back into the hands of the army engineers, to bide their good pleasure in furnishing the next, or some other Congress, with the necessary report and data upon which legislation may proceed. But while the chief river of the State is to have no attention save that invery limited commerce, and the navigability of which exceeds scarcely more than a dozen miles or so. Redwood creek is granted \$8,000, and the San Joaquin river is to have expended upon it the sum of river object. It is true that \$14,000 is allowed for a survey of the mouth of the Sacramento and of Suisun bay, but that there was any necessity for such appropriation without corresponding work to prevent the filling of the mouth of the river and the channels of Suisun bay, and their injury by the possible abandonment by the river of its old channels, is doubted. So, too, the usual appropriation is made to keep the snag-boat Seizer running, doing here and there a little nervous and spasmodic work in pulling tree-tops and snags. from lodgment in the stream. But this is a bagatelle, and has no relation to a thorough and systematic treatment of the river. Oakland harbor is to receive a quarter of a million dollars, through the importance of creating that harbor is secondary to the preservation of the navigability of the chief stream of the State, and which, as established before the House committee, is a larger and more important river than h the Potomac and the Susquehana com-

If this is not done, then no Pointed Comments on the Proposed Dohope can be entertained of any benefit accruing to the river by Governmental action for the next two or three years. But i some means could be devised to stimulate the proper department at Washington to would do an immense work in clearing the river and deepening the channel, and thus matter while the high waters prevail. In millions of valuable low lands cannot even be entertained, for while the United States and towns, and a great farming population cannot be asked to engage in any land reclamation schemes, the condition of the stream over which it has exclusive jurisdiction is such that neither State nor private enterprise can do anything toward reclaiming river lands until the Federal Government treats the stream for improvement of its navigability. But of course such considerations have no true place in the main question-the reclamation of the Sacramento river from the threat of permanent impairment than now menaces it.

We have the consolation, however, of

While these discouragements may well nigh paralyze activity by the friends of river interests, we should not despair, but put forth the best possible efforts to induce the engineers to engage promptly in the new work that it is said Congress will instruct them to commence. To despair is not an American trait of character, much of the Engineering Department to have the contemplated examination of the people, is deprived of the competitive advantage which nature gave it by the chokriver made with the utmost speed. ## THE SACRAMENTO RIVER.

It is not even certain that the proposed committee will not do us more harm than good in some respects. There is certainly some danger of it unless it is tied down closely

to its engineering problem.
"Last year one of the leading officers of he Engineer Corps, who has been conected with the work of the department on his coast, volunteered the opinion that the avigation of the Sacramento river is a natier of less importance than formerly, ecause it is paralleled by railroad lines It is hardly necessary to suggest to Californians the crudity of this opinion. They know that from Sacramento to Suisun Bay there is a stretch of the richest bottom land in the State, cut up into productive ruit farms, absolutely dependent upon the river for transportation, and upon the pro-per treatment of its channel, banks and outlet for safety from inundation. They know that along the Sacramento and Feather, above Sacramento city, there are miles of similar country, once populated and cultivated, now running to waste for want of protection from flood in winter and less is it the part of Californians. Our depth of water for transportation in the people are disposed to make the best of all summer and autumn. ### LOOKING AT THE STATE.

HIS WILL BE A GREAT AND GOLDEN YEAR FOR CALIFORNIA.

Development of Transportation Facilities-The People of Different Sections to Mingle More.

The San Francisco Alta of yesterday con-

tained the following thoughtful editorial: The last railroad map of California is quite a surprise to people who have not remembered the casual notices in the press of the extension of railroad lines. California was never so easy to travel over as now, and it is expected that the Southern Pacific Company is about to actively continue its policy of extending lines to regions that are capable of development by transporta-tion facilities. W. H. Mills has suggested to the State Board of Trade the benefit of excursion travel between different localities n the State, giving Californians a chance to look at their own State. We have long been of the belief that the Sacramento valey, north of a line drawn east and west through Woodland, would be urged to en-terprise and to breathe and move like a iving thing if men could be persuaded to inspect what has been done in the San Joaquin valley from Lodi south to Bakersfield. The town of Fresno alone has in it as much inspiration toward material improvement as the voice of the prophets of old had in the direction of enrichment of the spirit.

This is to be a great year, a golden year for this State. Authoritative advices from every leading fruit district in the East are to the effect that cherries and peaches will average there only one-tenth of a full crop. What this implies for our great variety excellent shipping fruits every planter knows. The demand will greatly promote new plantations, and the place to locate hese will be sought in new regions entirely, and that means an inducement to new lines of railroad to bring the product market. President Huntington and other railroad men have recently made a tour of some of the developed areas already penetrated by rail, and accepted as a revelation the fact that in Vaca valley 160 acres now supplies as much tonnage for rail shipment as the whole valley did before its transformation and the transfiguration of its industries. This means the other fact that 160 acres there now yields as much profit to its owners and employs

as much labor as the whole valley did under its old form.

These are stupendous facts, but they are facts which thousands of Californians have yet to learn by actual inspection. Eastern people came in contact with such facts in uthern California and that accounts for so many of them being practically swept off their feet in that part of the State. What CHILDREN'S ONYX BLACK HOSE. they saw and knew was in such vivid contrast to what they had experienced in the East that their prudence vanished. Withut generating a boom, which is most unesirable, the railroad people, the Boards of Trade and local industrial organizations of all sorts should promote an interchange of visits between distant communities all over the State. That excellent organization the Grange, or the Patrons of Husbandry, has been quietly serving the material fortunes of the State in this way for many years. Its various meetings held every year and its annual picnics have brought strangers ogether who parted as friends. Primarily devised for social intercourse, these assem-blies have spread a knowledge of the State

amongst i's fine rural people.

A good place to make a beginning would be with the Chamber of Commerce in this city. It would be well for our great merchants and our great farmers, raisin-plant rs and fruit growers to meet and mingl in the country. Each class now trusts largely to the press for its knowledge of the other. Contact in the country, in places where orchards and vineyards, field and farms, irrigation works, completed or progressing, are to be seen, would be of great benefit. San Francisco has taken the ide of commerce that flows down from the valleys and footbills of the State, and beween source and destination there has een but little acquaintance. We know Lodi for its melons, Fresno for its raisins, Vaca valley for its stone fruits, Napa, So-noma and Russian river for their wines, Santa Clara valley for its prunes and characteristic fruits, Santa Barbara for its olive oil and Los Angeles and San Bernardino

or their oranges. But between the people who produc and the merchants who handle these and the collateral trade which they support there has been too little intercourse. ity men need to be drawn out of their lubs and the country people away from heir plows and packing houses for a time o meet and know each other. Then each lass will better understand the enthusiasm of the Eastern visitor who passes between ity and country on a tour and sees and likes it all. There is no legitimate enterprise or established business in the State that would not be bettered by a freer minging of the people. The places that are alive with enterprise will be grateful for the appreciation of others, and those that need the spur of example to urge them to awaken will be glad of the tonic that changes their condition and contributes to their prosperity. Provincialism will mel away under such contacts. The State Board of Trade has started this sort of erment by compelling its affiliated bodie to meet by representatives in its regular councils, and the system which it has so well started should stir whole communitie to take a more frequent look at the whole

### REPUBLICAN STATE CONVENTION

WHAT OTHER PLACES APE DOING TO SECURE THE PRIZE.

San Jose and Fresno Want it Bad-The Sacramento Committeemen Not Troubled About It.

The local members of the Republican State Central Committee seem to feel quite sure that Sacramento will win in the strug-gle over the location of the coming State Convention. They expect the aid of the Convention. They expect the aid of the extreme southern and northern members extreme southern and northern members products during the month the horses of the committee, leaving those from the were sold, amounting to some \$1,500, as strength between San Jose and Fresno, both of which are making a red-hot fight for the prize.

At the late Republican Convention in San Jose a committee consisting of H. V. Morehouse, Jas. R. Lowe, J. C. Black, A. no embezzlement; that if any crime had was appointed to represent San Jose's interests at the meeting of the State Central was made that the complaint had been to every member of the committee asking that the State Convention be held in San Jose. They promise that if the Convention is held in their city the committee will be "relieved of the expense necessary to per form the business of the Convention," and that the delegates will be royally enter-tained. They claim that the holding of the Convention there would insure the Fifth Congressional District to the party and materially advance the interest of the

whole ticket. Fresno makes similar claims, and a committee of citizens has issued circulars setting forth the advantages possessed by that place for the holding of a State Convention. They also promise to relieve the State Committee of the "expense necessary to the business of the Convention," which probably is intended to include hall rent, gas, sawdust, etc.

Committeeman McMullen of this city was asked by a Record-Union reporter what steps, if any, were being taken toward securing the Convention for Sacramento and whether there seemed to be any likelihood of either San Jose or Fresno being selected. Mr. McMullen replied that no particular line of action had been planned, except that himself and fellow-committeemen from this county had consulted with the hotel proprietors and others directly interested, looking towards making some arrangement by which as advantageous terms could be offered the committee as the other places had promised. The committeemen from this county, he said, also purpose going to San Francisco a few days prior to the meeting of the State Committee to work with the country members.

It would seem that in view of the strenu-

ous efforts being put forth by San Jose and Fresno, Sacramento should be up and doing in the matter. It is true, beyond a doubt, that most delegates to the State Convention would prefer coming to Sacra-mento rather than to either of the cities mentioned. They know that the Capital city has better accommodations than any other place outside of San Francisco, and is more centrally located, but the delegates will have nothing to say in the matter, as the committee will settle the matter next Wednesday. Hence it behooves our committeemen to be active, and our citizens to show a readiness to make any necessary overtures to the Central Committee.

HUNTINGTON AND STANFORD. Resolutions Passed Complimenting the Retiring President.

SAN FRANCISCO, April 17th.-Colonel C-F. Crocker says that he is authorized to state that C. P. Huntington and Senator Stanford have become reconciled and have resumed friendly relations. Mr. Huntington has made a written statement or explanation regarding his remarks to the Directors, which exonerates Mr. Stanford from the charge of any improper conduct whatever, and which is entirely satisfactory to Mr. Stanford and his friends. Colonel Crocker says that by the explanation of President Huntington Senator Stanford is completely exonerated, and that the President of the Southern Pacific declares that a wrong construction was put upon his remarks before the Board of Directors.

At a meeting of the Directors of the Southern Pacific Company to-day, Senator Stanford alone being absent, the following

SAN FRANCISCO, April 17th .- Great interest has been manifested regarding the contents of the letter written by C. P. Huntington to Senator Stanford, and which is said to have resulted in a reconciliation between them. So many and various have been the reports regarding the nature of its contents, that it was thought advisable to make public the letter in its entirety. It was written on the 15th inst., and is as folKildare (the favorite) second, Applause the back of his wagon and proceeded on t

Dear Governor: So many items mentioning your name and mine have lately appeared in the daily papers that some of my friends think it would be well for me to write you a letter, hence this communication. Although I do not apprehend any danger that you and I will be put in a hostile attitude in our business, or, for that matter, personal relations, but the intervention of others, who not altogether understand our difference, may tend to separate friends. Our views, when at variance, have been freely expressed, and it is needless to allude to them further than to say that we have each of us agreed to disagree.

In the last race, in which Daisy D., Dave Douglas, Jack Brady and Coloma started, resulted as follows: First heat, Coloma first, Daisy D. second, Brady third. Time—1:43. Daisy was a hot favorite. Second heat, Dave Douglas first, Brady second, Daisy third. Time—1:53½. Douglas first, Coloma second. Time—1:48½. Betting was 3 to 1 on Douglas.

Remarks that I recently made at the Southern Pacific Board meeting were intended only as a reasonable expression of my views on these subjects. My words, and especially the phrase which relates to campaign uses of the company's funds—or, as I expressed it, "putting hands into the treasury of the company to defeat the people's choice"—have been construed in some quarters as a personal attack upon you. Allow me to say that I greatly regret this impression, since I did not intend to make such an attack or to charge that you had used the an attack or to charge that you had used the company's money to advance your personal interests, or for any improper manner; and I am satisfied that you have not done so. Allow me, also, to express the wish that our relations may continue as friendly hereafter as they have been heretofore. Yours, very truly, C. P. HUNTINGTON.

OREGON ITEMS.

### Fifteen Hundred Workmen Out of Em ployment in Portland.

PORTLAND, April 17th.-It is estimated that at present not less than 1,500 carpenters, painters, plasterers, bricklayers, tinners, roofers, in fact workmen of all trades, are now out of employment in this city, by reason of the "lock-out" declared vesterday morning by the Builders' Union. The workmen are simply waiting to learn what the builders intend to do, and say

they will fight it out if it takes all season and that non-union men cannot be had The situation is indeed interesting, and the longer it lasts the more critical it will become. All building will, of necessity, have to stop until the matter is settled, hence the blow is at the very vitals of the city. Captain John O'Brien, President of the Federated Trades, states that if arrangements are not perfected within the next orty-eight hours, a general strike will oc-

SAN FRANCISCO, April 17th.-It seems impossible for a meeting of the Blood-horse Association to be held without a watery protest from the clouds above. The slight showers that fell last night did not hurt the track, but on the contrary bettered it, but the raw. cloudy, disagreeable weather had a depressing effect upon both the horses and the attendance. # CALIFORNIA HOSPITALITY.

The Citizens of San Bernardino Welcom the Pioneers. SAN BERNARDINO, April 17th .- The New England Society of California Pioneers arrived here this evening at 6 o'clock, four hours late, caused by a broken rail on the Atlantic and Pacific road, which damaged the dining car. A most hearty welcomwas tendered the pioneers by the society here. Five hundred school children were in line at the depot, each carrying a bou quet in their hand, also the Society of Pio

neers, Native Sons and Daughters of the Golden West, and about a thousand citizens, with the Ninth Regiment band. The Native Daughters provided an abundance of flowers, including many orange blossoms, which were presented to the pioneers and ladies.

The speech of welcome was delivered by President Lord, 90 years of age, and responded to by Captain Thomas of Boston, when an adjournment was taken to the Opera House, where a good time was had and an interesting programme, consisting of addresses, music and poems was ren dered and old acquaintances renewed. The days of '49 were discussed by the old argonauts, the reminiscences of the past coming back forcibly to their mind. The excursion consists of twelve Pull-

man vestibule cars, including two dining cars, and is well equipped. There are about 150 passengers in all, some 60 being ladies. When the train arrived in the depot it was stormed by hundreds of uquets. The Pioneers were presented with a dozen boxes of oranges and a large amount of wine.

The excursion leaves in the morning for Riverside and Redlands. The Pioneers there is no ground for the objection that the State of Nevada would interfere with the taking of water from Lake Tahoe.
